

K-LOVE is a prominent figure and provider in our community. They have provided assistance and words of encouragement during difficult times in our lives as well as others around us.

K-LOVE's programming would be severely missed if replaced by an LPFM broadcaster. Several people, including my family of 6, have let K-LOVE into their lives and allow them to provide assistance and direction during times that we need to look to an outside resource for assistance. I trust K-LOVE and have developed a trusting relationship with them and depend upon them daily. By replacing K-LOVE, I would not have that resource available to lean upon each day to provide encouragement and direction.

K-LOVE is a highly visible interest item with the children in our church and community. They provide a service to our community by providing information on meetings and current events that affect us in the local area. In addition, they have partnered with local businesses to provide food baskets to thousands of families in the local area.

In my opinion, K-LOVE has become a part of many people's lives and has developed deep relationships with thousands of listeners. In addition, they provide hope to those who feel they have nowhere else to turn. Their partnership with the local community is essential!
